Our Experience
The division Industrial Profiles and Tubes offers more than 45 years of experience in extruding engineering thermoplastics for realizing the projects of our customers. Depending on the demands on the product, the process of extruding profiles and tubes as well as the coextruding can be completed by processes like printing, milling, thermoforming, welding, sawing and winding.

Certifications
DIN EN ISO 9001 : 2008
DIN EN ISO 13485 : 2008
Extruded Profiles and Tubes

For a wide range of industrial applications we offer extruded profiles and tubes based on approx. 25 different thermoplastics. Economic solutions and high precision are possible for pre-series and prototypes.

Suitable thermoplastics are available for applications in process engineering, medical engineering, mechanical engineering, electronics and electrical engineering, aerotechnics, measuring and control technology and other lines of business. Depending on the application it is possible to strengthen and/or modify the thermoplastics. Profiles and tubes can be machined by sawing, bending, welding, turning, milling according to customer’s drawing.
Customer-focused solutions based on 25 different thermoplastics

- Economic solutions and high precision are in the foreground
- Various cross-sections and surfaces
- Tolerances according to DIN EN 16941, DIN ISO 2768 or specific requirements
- Prototype produced with pre-series tool
- Tools and production facilities are constructed and produced in house
- Continuing processes to complete solutions are offered from one hand
Tubes with an outer diameter up to 120 mm, a wall thickness up to 20 mm and a length up to 12000 mm. DIN 8077 / 8078; DN 14860 or DIN 73378
Our services

Advice
We offer our experience and knowledge about raw material, application and process technology.

Quotation
Our non-committal, economical quotations are based on a qualified requirement profile.

Production
Production in due time on our extrusion line in compliance with agreed quality characteristics and ordered quantities.
