Ensinger opens machine shop in Bangalore

Expanding local value creation and customer proximity in India

Plastics processor Ensinger has recently opened a machine shop in Bangalore, India, expanding its local offering to include the machining of customer-specific plastic components. The facility complements the company's existing sales presence in India, strengthening local value creation and customer proximity. Ensinger plans to employ more than 50 people at the new site.

Established in 2012, Ensinger India distributes engineering and high-performance plastics across India through its sales office in Thane and its stock shapes warehouse in Bhiwandi, both in the Mumbai Metropolitan Region.

Local expertise for demanding applications

The new machine shop is located in Bangalore's High Tech Aerospace & Defence Park. By adding local machining in Bangalore to its existing distribution network in India, Ensinger aims to offer customers greater flexibility and responsiveness. Target sectors include aerospace and defence, semiconductor and electronics manufacturing, oil and gas, medical technology, pharmaceutical processing, and food and beverage equipment.

Sivakumar Chokkalingam, Managing Director of Ensinger India, says: "The new machine shop brings our material knowledge and machining expertise together. As a one-stop shop for stock shapes and machined components in India, we can respond more directly to our customers' requirements."

Ensinger India Engineering Plastics Pvt. Ltd. has achieved AS9100 certification for its Bangalore site. The certified scope covers the manufacture of precision-machined engineering and high-performance plastic products for aerospace, defence and general industrial applications.

Supporting customers in a growing economy

"We are delighted to open our Bangalore machine shop and thank everyone involved for their dedication, teamwork and support," says Ralph Pernizsak, Managing Director of the Ensinger Group. "This investment supports our global growth strategy and brings production closer to our customers. Local machining also strengthens our contribution to India's growing economy."

New site address:

Ensinger India Engineering Plastics Pvt. Ltd.
High Tech Aerospace & Defence Park, 2 P/1
KIADB Hardware Park, Road Number 1
Bengaluru, KIADB GLSR
Bengaluru Urban – 562149, India

The **Ensinger Group** is engaged in the development, manufacture and sale of compounds, semi-finished materials, composites, technical parts and profiles made of engineering and high-performance plastics. To process the thermoplastic polymers, Ensinger uses a wide range of production techniques, such as extrusion, machining, injection moulding, casting, sintering and pressing. With a total of more than 2,500 employees at over 30 locations, the family-owned enterprise is represented worldwide in all major industrial regions with manufacturing facilities or sales offices.

Ensinger India Engineering Plastics Pvt. Ltd. supplies engineering and high-performance plastics to customers across India. Its Bangalore (Bengaluru) facility machines these materials into customer-specific components for demanding industrial applications. The company also operates a sales office in Thane and a stock shapes warehouse in Bhiwandi, both in the Mumbai Metropolitan Region.
